

Gigaclear[®]

Ultrafast Full Fibre Broadband for Brize Norton

For almost 10 years, Gigaclear has been building full fibre broadband networks in rural areas across the country, and we are pleased to announce that we are coming to Brize Norton. Founded in 2010, Gigaclear is principally owned by Infracapital, a leading European infrastructure investor. We currently have over 26,500 live customers benefitting from our Ultrafast service.

The network build is planned to commence later this year and every home and business included in the programme will be notified in advance of the work commencing. Fibre cables will be laid underground to connection points that will be positioned at the boundary of each property on public land. Where we do need to cross private land, landowners will be contacted via our Network Access Team. Capable of delivering up to 1Gbps (1000 Mbps) once the network is complete, you will have access to the best broadband speeds available.

We will keep the Parish Council fully informed during this planning stage.
